

## California Proposition 65 Statement

The California Safe Drinking Water and Toxic Enforcement Act of 1986 (known as California Proposition 65 or “Prop 65”) requires companies that make or sell products in the State of California to abide by the following:

- To provide a clear and reasonable warning before knowingly and intentionally exposing anyone to chemicals that are known to the State to cause cancer or birth defects or other reproductive harm.
- To prohibit knowingly discharging or releasing a chemical on the Prop 65 List such that it is likely to, or will, enter any California drinking water source.

Prop 65 requires the State of California to maintain and update a list of chemicals known by the State to cause cancer or reproductive toxicity (“Prop 65 List”).

We work with our suppliers to investigate the compliance with Prop 65. After evaluating our suppliers’ certifications, compliance documentation, and material composition information, we have determined to the best of our knowledge and belief that:

- Certain of our products may contain one or more chemicals on the Prop 65 List. During normal product use, these chemicals are not intended to be exposed to users, nor are they intended, or expected, to be released or discharged to drinking water sources. Therefore, our products are not required to include warnings related to Prop 65. We may not be able to provide a specific list of contained Prop 65 chemicals for our evaluation kits.
- We will provide clear and reasonable warnings if we determine our products have a possibility of exposure to Prop 65 chemicals beyond Safe Harbor limits, or determine a risk of discharge or release to drinking water sources.
